About the vegetarianism

The common cosmic trogoautoegocratic law

In name of the truth, I should say, that there is a great law that can be name as: Common Eternal Cosmic Trogo-Autoegocratric law, such law has 2 basic main factors....Swallowing and be swallowed.

Reciprocal feeding of all organisms. Unquestionably, the bigger fish will always swallow the small one, and in the deep jungles the weaker will succumb against of the stronger; that is the law of the life...

It does not matter how good vegetarian will us be, in the tomb, our body will be devoured by the worms, so the law of the Common Eternal Cosmic Trogo-Autoegocratic will be fulfill. Indisputably, all organisms live of other organisms, if we descend in the inner earth, we will discover a metal that is used by the evolutive and involutive forces of the nature to gravitate, emphatically I'm referring to the copper.

If for example we applied the electricity positive factor to aforesaid metal, we could experience with the sixth sense, wonderful evolutionary processes, in the molecules, in the atoms, thus, if we applied the electricity negative force, we see the inverse, in-volutionary process quite similar as of our time decadent humanity.

The neutral force will keep the metal in static or neutral state. Obviously, the copper radiation is transmitted as well to other metals that exist in the inner earth and vice versa, the emanations of those metals, are received by the copper and so the metals in the inner earth are been feed reciprocally, so there it is the COMMON ETERNAL COSMIC TROGO-AUTOEGOCRATIC law.

It is wonderful to know that the radiation of all metals between the Earth entrails in which they develop, is transmitted to other outer space planets, the emanations reach the inner, to be said, they reach the live core of our solar system neighbor planets. Such radiations are receipt by the core metals of those other planets which live inside them, they also irradiate and their radiations are energetic waves that reach our inner earth to feed the metals of this planet were we live, move and have our being.

All worlds live of other worlds, that is obvious, undeniable, clear and manifest, and over this reciprocal planetary nourishment law, the cosmic balance is based, isn't it interesting, truth? How nourish the worlds each other, how living each other, a wonderful and so perfect planetary balance is adjusted?

The water in the worlds is to say the basic food for the crystallization of this great Eternal Common Cosmic Trogo-Autoegocratic law, think for a moment, what could happen to us, our

planet earth, the plants and all animal creatures if there is no water, or it evaporates, or disappeared or ended.

Obviously, our world will be transformed into a Great Moon, in a cosmic corpse, it could not crystallize the great common eternal cosmic trogo-autoegocratic law, all creatures will die of hunger. This great law is processed certainly, according to the Triamashikamno Saint (The Saint Three) and the sacred Hepta-Parapharshinock (Law of the Seven) Laws.

Observe well how these laws are processed, an active principle for example, approaches a passive principle, been more clear, the victim is swallowed by the active principle, that is the law, truth? The active principle we can say is the positive pole, the passive principle will be the negative pole and a principle that conceals both is the third force.

The first is the Saint Affirm, the second is the Saint Negate, the third is the Saint Conceal, this last one conceals the affirm with the negate and the victim sure it is devoured by whom it corresponds according to the law, understood?

The tiger for example swallows the humble rabbit, the tiger will be the Saint Affirm, the rabbit will be the Saint Negate and the force that conceals both, the Saint Conceal, and thus the Common Eternal Cosmic Trogo-Autoegocratic law is fulfilled.

The eagle for example will be the Saint Affirm, the poor chicken will be the Saint Negate, the eagle eats the chicken and the third force the Saint Conceal, conceals both as a whole, this is cruel, apparently yes, but what can we do, is the law of the worlds, this law has already existed, exists and will exist forever, the law is the law and it is fulfill, above opinions, concepts, habits, etc.

We need to continue because it is important to dig a little more, pierce more to the bottom of this subject, really from where this Common Eternal Cosmic Trogo-Autoegocratic Law come from? I say that it comes from the active OKIDANOK, Omni-penetrating, Omniscient, Omni-compassionate.

Then, that active Okidanok from where emanates? What is its causorum cause? Indisputably such origin or cause, is not other than the Absolute Sacred Solar, so, the Absolute Sacred Sun emanates the Saint Okidanok.

Although we said it remains inside the worlds, it does not completely remains involved inside them, it can not be imprisoned and for its creative demonstration, it needs to unfold in the three forces know as positive, negative and neutral.

During the demonstration, each one of this three forces works independently and apart, but always tied to its origin the Saint Okidanok.

After the demonstration, this three factors or ingredients, positive, negative and neutral, merge again, to join with the Saint Okidanok and at the end of the Mahanvantara, the integral, complete and total Saint Okidanok, is reabsorbed in the Absolute Sacred Solar.

Then see my dear brothers, see Efraín Villegas Quintero, the origin of the Eternal Common Cosmic Trogo Autoegocratic, starting from this principle, THE VEGETARIANISM, REMAINS WITHOUT BASIS.

Obviously, the vegetarianism fanatics have done of it, a kitchen religion and this is really sad.

The great Tibetan masters are not vegetarian, and if you don't believe me, read the book titled "Beasts, Men and Gods" written by a polish explorer, who has been in the Tibet, was welcome by the Masters. What is curious is that in such banquets and feasts where he was present, the bull meat depict as the nourish basic meal.

To the vegetarianism fanatics my words will sound foolish: to Kozobzky, author of the aforementioned book, will be cheer because he will see that I have understood this important thing.

Is then foolish affirm that the great Tibet masters are vegetarians. When the great adept Saint German, Prince Rakozy, the great master of the White Lodge that leads the world politic ray, to be more cleared he worked around the Louis XV period and he did not demonstrate as a vegetarian, he was seen eating everything in the feasts, some people for example commented that he delighted chicken meat, well from where this vegetarianism came from?

Indisputably, the vegetarian school is against the Common Eternal Cosmic Trogo-Autoegocratic, that is obvious; on the other hand, animal proteins can not be disdain, there are necessary for the nourishment.

I was a fanatic vegetarian and in the name of the truth, I told you that I was disappointed about the system. I still remember that in the Sierra Nevada, in that period, I tried to change a dog been hundred percent vegetarian, yes, the animal learned and applied the system, but when it learned, died.

However, I observed that creature symptoms, the weakness presented prior to his dead, later, in the Republic of El Salvador, the same aforesaid symptoms happen to me when I came back home, going up in long street like a hill, I was sweating awfully.

My weakness augmented horribly, I believed that was about to die, with nothing else to do, I called Teacher Litelantes my wife and asked her to roast for me a piece of bull meat, she done it and I ate the meat, then my energy came back to my body, feeling that I was alive again.

From that time I was disappointed about the system. Here in Mexico, I met the Director of a Vegetarian School in his restaurant, this was a German man, his body was weaken awfully, terribly until the symptoms of my dog experiment showed up.

The unfortunate man, completely weaken, pass away. I also met Lavahniny, a yogi, gastrologist, and with some other attributes, a pain in the neck vegetarian fanatic. He represent the Round University in Mexico City. His organism was weaken awfully with the vegetarianism, showed the symptoms of my dog experiment and pass away. Thus my dear

brothers that read this book, know that the Common Eternal Cosmic Trogo-Autoegocratic Law exists and that is it useless trying to escape from this sacred law.

This law emanates from the active OKIDANOK, I said. It is not possible to corrupt or change this law, I don't want to say with this that all of us need to become just carnivorous, no, it is better that we become balanced; Doctor Krumm Heller said, that all of us need 25% of meat in our meals and I'm in agreement with Master Huiracocha.

An I iterate: no matter how vegetarian we will become, the law fulfills and when we arrive to our tomb, the worms will eat our body, like it or not, because the law is the law, that is obvious, truth?

The cows are one hundred percent vegetarian and nevertheless as a great initiate said, "never we have seen an adept cow". If we would not eat meat, we can fully self-achieve, I can assure you that, although I died, I would quit eating meat and all we would not eat it.

But nobody will become more perfect because he quits eating meat, some people say why they are going to introduce into their organisms animal elements if they are already in the footpath of perfection, etc. etc. Those who say such things, ignore their own internal constitution; better off that these people eat a piece of meat and not to continue with their own aggregated animal defects (psychological defects) that carried on their psiquis.

The human body has a vital body as a basement, the Lingam Sarira of which the Theosophist speak; beyond all that, what is what exists within the organisms of these living and intellectual humanoids? The animal aggregates (psychological defects), those psychic aggregates who personify our errors/mistakes, those beastly monsters of our passions.

Thus well, better off to eliminate those monsters, than worry about the little piece of meat that is serve in the table at meal time.

When we eat the cow or chicken meat, we did not harm ourselves in any way; however, with all those beastly aggregates who we carry, not only we are harming ourselves, but also we are harming our fellows, which is worse.

It is perhaps not important the anger? the greed? the lust? the envy? the pride? the laziness? the gluttony? and what we will say of all those beasts that we carry inside us and that represent the babbling? the calumny? the gossiping? etc., etc., etc

Better it is than we do not wash our hands being conceited as saints...the time that we become more comprehensive has arrive; the important thing is to die in ourselves, here and now, nevertheless I do not want for such reason to deny the food selection. In would never advise, for example eating pig meat, it is already known that this animal is leprous and that its psiquis has one too brutal, which harms our organism...

Is advisable eating healthy food, chicken or cow meat, but never eating it in excess because the excess is completely harmful, detrimental.

OK my dear brothers, I believe that with which I have spoken about the vegetarianism, you have sufficient direction to know how to properly feed your body (without excess or lack), that is to say, within a perfect balance, that is all.
